

Bethel Mission School

Uttarpali, Kishanganj, Bihar-855107

Activity

Eco-Friendly Club:

The school organizes several seminars, debates, campaigns and programmes to create awareness regarding environmental concerns. Students are taught the importance of trees, animals, water and the earth. They are motivated against using plastic, loud speakers, pesticides and unrecyclable materials. They are encouraged to use bio-degradable materials, reduce waste, conserve water and keep their surroundings clean. The club conducts numerous activities throughout the year like tree plantation, water conservation, waste disposal and so on. Every Thursday is celebrated in school as Eco friendly Thursday.

Health and Wellness Club:

The school organizes multiple awareness programmes. Initiatives are taken to teach students first aid and life saving techniques such as CPR and Heimlich Maneuver. Students are taught important skills so that they can save someone's life or help someone in times of need. Educational events are organized to provide students with basic healthcare and to create awareness among them regarding the prevention of

diseases. Every Wednesday is celebrated in school as Health and Wellness Wednesday.

Music Club:

The school selects from amongst the students the best vocal artists and musicians and brings them together. Students are allowed to practice their art

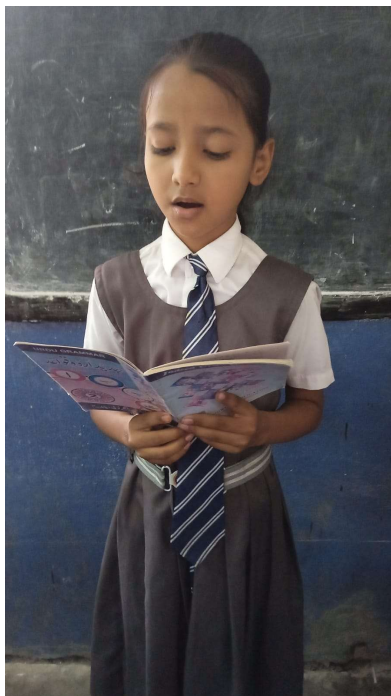

and showcase their talents. They are subjected to regular practice every week to help them to master their skills. The school choir performs everyday in the morning assembly and talent shows are held annually for the students. The weekly bagless day is also great for students as they find in it an opportunity to express their musical prowess.

Book Club:

The school conducts book reading sessions for interested students every week.

This develops reading skills and allows students to gain knowledge beyond the scope of the syllabus. The school offers a great selection of books as it has an abundant library of books of different genres. Students are also encouraged to read books on their own and write book reports. This enhances critical and analytical thinking and helps develop writing skills.
